Skills

Technical Skills:

- Programming Languages: Python, Java
- Web Development: HTML, CSS, JavaScript
- Databases: MySQL
- Version Control: Git, GitHub
- Development Tools: IntelliJ IDEA

Soft Skills :

- Problem-solving and analytical thinking
- Communication and teamwork
- Time management
- Ability to learn and adapt
- Leadership qualities

Language

- Native Proficiency : Sinhala
- Work Proficiency : English

Upuli Kuruppu

BEng (Hons) Software Engineering Undergraduate

I am Upuli Maheshika Kuruppu, an undergraduate Software Engineering student at the University of Westminster, passionate about building innovative and efficient software solutions. I thrive in both collaborative and leadership roles, leveraging strengths in teamwork, time management, and problem-solving to contribute meaningfully to every project. I am particularly interested in software development, AI, and IoT, and aspire to continually enhance my technical skills while delivering impactful solutions. Beyond academics, I have a strong passion for music, which fuels my creativity and focus.

Education

2024 - Present

UNIVERSITY OF WESTMINSTER

BEng (Hons) Software Engineering

First Year Modules

- Computer Systems Fundamentals
- Mathematics Computing
- Trends in Computer Science
- Software Development I (Python)
- Software Development II (Java)

Second Year Modules

- Object Oriented Programming
- Database Systems
- Software Development Group Project
- Software Engineering Principles & Practice
- Machine Learning and Data Mining
- Algorithms: Theory, Design & Implementation

2020

IMBS Green Campus

- Diploma in Information Technology
- Diploma in English

2014 - 2023

Rathnavali Balika Vidyalaya, Gampaha

- Completed GCE Advanced Examination
Stream - Mathematics
- Completed GCE Ordinary Level Examination
Passed all 9 Subjects with a result of 9As

2009-2013

Yasodara Devi Balika Vidyalaya, Gampaha

- Completed Grade 5 Scholarship Exam - 2013

INTERESTS

- Developing AI-driven solutions for real-world problems
- Machine learning applications in healthcare and sustainability
- Full-stack web and mobile application development
- Internet of Things (IoT) and smart systems

Extra Curricular Activity

Memberships:

- Member – IEEE (2024 - present)
- Member – IEEE Robotics and Automation Community (RAS SBC) (2024 - present)
- Member – IEEE Computational Intelligence Society (CIS) (2024 - present)
- Member - IEEE Women in Engineering (WIE) (2024 - present)
- Member of Rotract Club IIT (2024 - present)

Participation & Workshops:

- Participation in Hackathons
- Participation in technical workshops

VOLUNTEERING AND LEADERSHIP

School Prefect Board

- Junior Prefect (2018 – 2019)
- Senior Prefect (2023)

School Cadet Band

- Lance Corporal (L/Cpl) – 2019
- Sergeant (Sgt) – 2020
- Company Sergeant Major (CSM) – 2021
- Corps Regimental Sergeant Major (Corp RSM) – 2022

Volunteering

- Treasurer – Thirasara Saviya Social Organization (2021 – 2023)

PROJECTS

SDGP Group Project – Mental Wellness App + IoT Device

- Contributing to a Software Development Group Project (SDGP) focused on the IceCap device, addressing sustainability and environmental impact.
- The project aligns with UN Sustainable Development Goals and focuses on monitoring, efficiency, and responsible resource usage.
- Responsibilities include research, requirement analysis, documentation, and software-related components of the system.

Technologies: Research-driven software development, documentation, teamwork tools
Status: Ongoing (Group Project)

Medicare Hospital Management System (Ongoing)

- Currently developing a hospital management system to support patient records, appointments, and basic administrative workflows.
- Focused on applying object-oriented design principles and clean code practices.
- Project emphasizes real-world problem solving in healthcare environments.

Technologies: Java / Python (to be finalized)
Status: Ongoing

Academic Book Reference Platform (Ongoing)

- Designing an online platform for university students to search and refer academic books and research materials, inspired by platforms such as Google Scholar.
- Aims to improve access to academic resources through structured search and referencing features.
- Focus on usability, information organization, and student collaboration.

Technologies: Web technologies (HTML, CSS, backend in progress)
Status: Ongoing

Traffic Management System (Python)

- Developed a Python-based system to process and validate traffic data.
- Implemented CSV data handling, input validation, and result generation.
- Focused on clean code structure and error handling.

Technologies: Python
GitHub: <https://github.com/UMKpp>

Library Management System (Java)

- Designed and implemented a console-based library management system.
- Features included book inventory management, member registration, borrowing and returning books, and search functionality.
- Applied OOP concepts such as classes, inheritance, and encapsulation.

Technologies: Java
GitHub: <https://github.com/UMKpp>

Tourism – Sri Lanka Website (Web Development)

- Created a static informational website promoting tourism in Sri Lanka.
- Focused on structured content, layout design, and basic responsiveness.

Technologies: HTML, CSS
GitHub: <https://github.com/UMKpp>
